

Yarning Cards

For stopping sick ears

When using this resource, you get the chance to yarn about how sick ears and hearing loss affects you and your family.

When you have had a yarn, go back to the "Stopping sick ears" web page and you can learn about sick ears and how to stop kids getting them.

What does your family
do when kids have
sick ears?

What do other families
you know do when their kids
have sick ears?

After you have yarned about these cards and looked at the website, you could then:

- Write down what you want to tell people about what you have learned.
- If you are training early childhood workers you could get people to do a collaborative painting or drawing that shows what has been learned.
